Remember When: Silly Putty

During World War II, a rubber shortage prompted a search for a synthetic substitute. A chemical engineer at General Electric combined

boric acid and silicone oil, the result was a stretchy material. It wasn't a good rubber replacement, but it was fun to play with. A toy marketer packaged 1oz balls of the putty in plastic eggs and sold them. Silly Putty became one of the most popular toys of the 20th century.

CHOICES Restaurant Happenings

The Food and Nutrition Services (FNS) department at Villa Crest Nursing & Retirement Center has been working closely with the residents to offer additional food selections in CHOICES restaurant.

Residents have recently participated in taste testing at the monthly food council meetings. They welcomed the opportunity to evaluate the food and make suggestions for items, they would like to see on the menu.

Recently, our chef has been providing weekly table-side service in CHOICES, with cooked to order specialties, such as shrimp scampi, omelet stations, and homemade Belgium Waffles.

Stay tuned for delicious new items on the seasonal menu such as summer barbeque foods, Italian pasta with flavorful sauces and teriyaki rice bowls.
